

College Credit Plus EXCEED FULL TIME Status Rule

College Credit Plus- How many college credits can a student earn?

Students can earn a maximum of 30 college semester credit hours per academic year and a maximum of 120 college semester credit hours prior to their high school graduation.

The Ohio Board of Regents has established a formula that students must refer to when **registering for high school and college courses**. This formula is utilized to insure that students **do not exceed full-time status**.

Full-time status can be calculated as follows:

1. Determine student's number of high school ONLY credits,
2. Multiply that number by 3, and
3. Subtract the result from the number 30
4. That number is the total number of college credits that CC+ students may earn that academic year.

Example:

If a student is taking a full schedule at Waynesville High School (six periods-six units), you will take $6 \times 3 = 18$ and subtract 18 from 30 to get 12. Then 12 credits would be the **MAXIMUM number of college credits that a student can take during the academic year**. If a student goes over the maximum number of semester credit hours, the students/parents would be responsible for the financial costs associated with that college course.
